Laurel Valley Compost...It's Time and Money Well Spent

2008 Product List (Wholesale Only)

Fresh Mushroom Soil

A brown fibrous composted material. Can be used as mulch. Adds nitrogen, phosphorus, and potash to the soil. Also builds soil structure. Weed free. Available in Certified Organic form with prior notice.

Aged Mushroom Soil

Unscreened, semi-finished compost. An excellent material for enriching existing soils and flower and garden beds.

Premium Compost

Finished screened compost. Clump and debris free. Fine texture, dark in color with excellent water-holding capability. Rich in nutrients. Suitable for all work from garden planting to lawn construction.

TurfDress

Finished, screened, blended material. Containing a variety of agricultural products: (Hardwood sawdust, cocoa bean hulls, cottonseed meal, and poultry litter). Processed and cured on a cement pad. Our highest quality compost.

Horticultural Compost

Blended from hay, straw, corncobs, hardwood sawdust, cocoa bean hulls, cottonseed meal, and poultry litter. Pasteurized to destroy weeds and other pathogens. Super rich in beneficial micro organisms. Excellent for brewing compost teas and high-end gardening projects.

TurfSoil

Finished screened (3/8-) blended material, containing equal parts of our Turf Dress and deep dug native soils. Ideal for topdressing and all other needs where a high quality organic soil blend is required.

Enriched Topsoil

A screened (1/2-) blended topsoil consisting of native mineral soil and compost. Manufactured to produce fine textured topsoil. Exceeds most topsoil specifications.

Cyclone Compost

100% weed free, this material will flow freely through most blower truck equipment without clumping, bridging, or clogging. Organic based, this material has a fibrous texture which will aid in holding seeds in place and in soil stabilization. It is a great product for lawns, sports fields, fairways, and hillside stabilization projects. It can save money by reducing both application times and labor cost.

Container Media

Compost based media with pine bark and peat moss added.

Green Roof Media

Please see www.skylandusa.us or call our Skyland USA office (610) 268-0017.

Custom Blends

Custom blending per your specifications available on request.

Call for pricing and delivery rates. Prices are subject to change without notice.
